

# Individual Reflection – Adam

## Week 1:

1. What do I want to learn or understand better? Consider e.g. teamwork, scrum, agile processes, technologies etc.

I am still somewhat unsure about scrum and the agile processes which is something I want to change. I know this stems from my reluctance to go to the lectures. This is due to the fact that I know that I almost fall asleep during them and thus I don't remember what was said, and as such the time feels wasted.

2. What is my contribution towards the team's deliveries? How can I help my team do better next sprint?

This week was mostly a "set-up" week and as such not much was done on the project in itself. However, as I had some problems getting android studio working on intellij on my laptop, I could personally not contribute much towards the actual product this week. I do feel that my contribution in regard with structuring the group dynamic and coming with ideas of how the product should look was substantial enough that it compensates my inability to work on the application though.

3. Changes/improvements from last week's reflection?

As this is the first reflection there is nothing to compare to.
